Bitcoin VCs Snapshot
source: Recursive Research

Major Challenges

Regulation

Mostly legal, with differing levels of restrictions and access.

No unified or clear regulation across continent or template frameworks to follow.

Tools

Tooling on the level of FinTech, mostly on custodial-side.

Still difficult to access KYC-free coins, complex UXs, etc.

Education

Encouraging progress, but still needs a lot of work

Pervasive FUD and lacking widespread on the ground training pipeline for educators.

FUTURE AHEAD

Thank you!
